

Tombow

Glue Pen Resist Method

Tombow's **MONO Glue Pen** has pinpoint coverage for detailed gluing and also acts a resist when used with the **Dual Brush Pens**.

The **Glue Pen Resist Method** first adds highlights to tangles using the **MONO Glue Pen**. Let it dry a few minutes and then cover the area with **Dual Brush Pens** color using any of the many blending techniques.

When the color has dried, the glue resists the color and stays white. A very interesting detail when creating your colorful ZIAs and making those tangles POP! The **MONO Glue Pen** is also wonderful for adding small rhinestones for fabulous bling on your tangles!
